Signature’s range of Pedestrian Crossing standard equipment range now incorporates the patented Zebrasafe and Centresafe, offering the ultimate solution for pedestrian visibility. In addition, Signature supplies associated equipment, such as Signplate, Twin Amber Flasher units, Inter-active Signs and Variable Message Signs to assist in 'Safer Route' schemes.

Introduced in 1993, the Zebrasafe and Centresafe (PATENT GB2287496B) have proven to be the most effective method in offering high visibility to drivers and pedestrians throughout the UK. The application of this equipment also extends to other non-highway locations, such as airports and supermarkets. This equipment has been developed to now offer either PL11 Spine, CDM or high flux LED illumination. Signature’s ethos offers our customers freedom of choice options such as combination assemblies and various beacon illuminated methods. All products conform to current BS Standards.

Assembly comprises of mild steel post, galvanised to BS729; Dekra-Lite black with integrated translucent vandal resistant poly inner tube for internal illumination.

Raise and Lower

The Raise and Lower range is a base hinged fold down post which is raised and lowered by means of a detachable winch.

Benefits
♦ Can be installed in restricted areas
♦ Working at heights is eliminated
♦ Safe working operations
♦ Manual handling is reduced to raise and lower post
♦ Lightweight winch operations
♦ Double fail safe systems are located internally and externally
♦ On site assembly can be done if access to area by transport is not permitted
♦ 3 bolt assembly
